

**PEPPERBALL® PRESENTS**

# **INSTRUCTOR/ARMORER COURSE**

There is an increasing emphasis on ensuring that law enforcement and other agencies have a non-lethal option for crowd management, daily patrol, and other activities. PepperBall® addresses that demand and is a complete non-lethal defense solution designed to save lives. From advanced military operations to everyday police work, PepperBall supplies the right hardware and training to allow officers to be prepared whenever the unexpected happens.

The Instructor/Armorer course certifies students as PepperBall Instructors and Armorers for their individual agency, allowing them to design a course in the safe and effective use of the PepperBall system and to service and maintain their launchers. Every agency wishing to deploy the PepperBall system should have at least one certified officer.

Students will learn to understand the PepperBall system and its capabilities, evaluate the deployment of other less lethal platforms as a method of control or de-escalation, identify the problem/threat and determine what is a reasonable response. In addition, students will develop the skills needed for the safe operation, deployment, and maintenance of the PepperBall system and are given the knowledge and materials to build a custom PepperBall course that fits within their specific agency and adheres to their policies and procedures.

The Armorer portion of the course will teach students how to maintain, break down, and assemble the various PepperBall launchers. After completion of this course, students will be able to identify, problem solve, repair, and maintain the various PepperBall launcher systems.

**THIS IS A MUST ATTEND COURSE FOR AGENCIES LOOKING TO IMPLEMENT THE PEPPERBALL SYSTEM.**
