

**PepperBall®**

## **REASONABLE USE PRACTICES**

**Always follow agency policy, state and local laws, and federal case law as guiding factors**

- Verbalize commands and warnings
- 

- Depending on the level of risk, PepperBall recommends area saturation first by impacting surrounding objects like walls, ground, automobile, and trees. This will alter the environment and may be enough to change behavior without additional deployment(s)
- 

- If impacting a subject is required, PepperBall recommends avoiding the head, neck and spine
- 

- A non-lethal or less-lethal device should be never be used as a punitive tool
- 

### **SPECIAL CONSIDERATIONS:**

**PepperBall discourages use on seniors, youth, pregnant women and non-violent individuals with mental or physical disabilities. Always follow department policy and applicable laws.**
